Philanthropist of the Year

Dr. W. Colby Stewart, Most Donated
Cataract Surgeries

MISSION: Committed to preserving and restoring sight with comprehensive eye care surgeries, medications, and ancillary services for individuals in financial hardship; and supporting education and research initiatives for the benefit of the community.

HISTORY: Physicians of Houston Eye Associates formed the Houston Eye Associates Foundation, with the belief that everyone deserves complete surgical and medical eye care services despite their economic status. Supported solely by the charitable donations of individuals, private foundations, corporations, annual fundraising events, and donated physician services and medical professionals, the Foundation has successfully treated thousands of patients since 1981.

2019 PROGRAM EXPANSION: Influenced by Eye Care for Kids Foundation, founded by Dr. Irv Wishnow, of Wishnow Vision Associates, we are proud to expand our program services to include an Eye Care for Kids Vision Program. This new program will provide vision services to uninsured students throughout the Greater Houston Area. No child should fall behind in the classroom for not having the resources for corrective vision, and we look forward to sharing this new journey with all of our grateful supporters.
